

Missouri Schools Go Digital

to Simplify K-12 Nutrition Operations

Willard Public Schools transformed its nutrition operations by going 100% paperless, and implementing engaging online menus for families. This Missouri district is delivering a better K-12 nutrition experience to staff, students, and families.

Previously, the district struggled with creating and sharing online menus, managing time-consuming paper production records, and completing stressful administrative reviews that relied on manual data pulls. By partnering with LINQ, they've automated processes, streamlined administrative reviews, and improved communication with parents.

How They Did It:

- **Engaging Online Menus**

New website with intuitive K-12 menus, increasing parent engagement and access to nutritional information.

- **Saved 20 Hours Weekly**

Automated production records eliminate manual data entry, saving approximately 20 hours per week.

- **Simplified Administrative Reviews**

Integrated solution streamlines the Missouri DESE Administrative Review with easy access to required documentation and reports

- **Earned Praise**

The state agency praised the clarity and organization of Willard's Administrative Review data.

“We had our DESE Administrative Review last month, and LINQ was a lifesaver.”

Phil Broyles

Director of Nutrition Services, Willard Public Schools

About LINQ

LINQ delivers cloud-based K-12 operations software that simplifies school nutrition, finance, HR, and payments. By integrating everything into a single platform, LINQ helps districts reduce complexity and focus resources where they matter most.
